

BlackBerry® Edition

MDaemon v12 Installation – Quick Start Guide

MDaemon, BlackBerry Edition v12 Installation Guide

Step 1 – Install MDaemon

1. Download the MDaemon installer file from <http://www.ccsoftware.ca/mdaemon/download.cfm>.
2. Select the language you wish to run the installer in and click the “Go” button.
Please note that this is only for the installation portion. If you require a language specific version of MDaemon you’ll need to download a separate file.
3. Double-click the MDaemon installer on the Windows desktop to bring the installation. Then click “Next” on the Welcome Screen.
4. Select your country and check the box to indicate that you have read the license agreement when ready, then click “Next”.
5. Select a destination directory for the installer to copy the files to, then click “Next”.
6. Check the box if you would like to install the BlackBerry Enterprise Server components, then click “Next”.

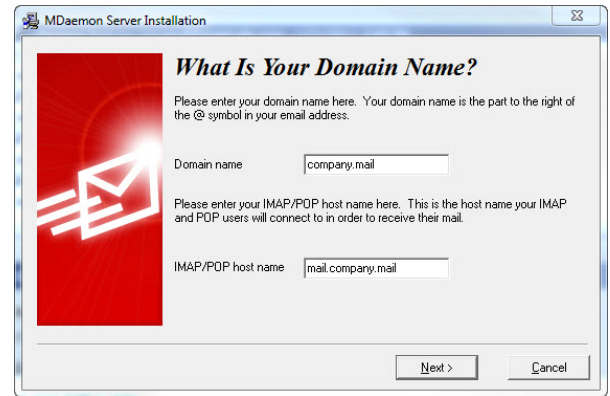

7. Select your preferred installation type:
 - A. Select the first option to install a fully functional 30 day trial of the PRO/BlackBerry Edition version of MDaemon
 - B. Choose the middle option to install a FREE, but feature limited, 5 mailbox version of MDaemon.
 - C. Select the final option if you have already purchased a license key for MDaemon.
8. On the following three “Customer Information” screens, enter your country, address, and other requested information. **If installing a 30-day trial, then be sure to enter a valid email address. Your trial key will be sent to this address, and must be entered before proceeding to the next step.** Click “Next” to continue.
9. On the “Ready to Install” screen, click “Next” to continue with the installation process. The MDaemon files and integrated BlackBerry Enterprise Server components (if this option was selected on the BlackBerry Synchronization screen) will be copied to the destination directory.

MDaemon, BlackBerry Edition v12 Installation Guide

Step 2 – Your Domain Name

Enter the domain name used in your email address (e.g. ccsoftware.ca), and your IMAP/POP host name (e.g. mail.ccsoftware.ca)

Step 3 – Set Up Your Postmaster Account

Enter the full name, mailbox, and password for your first account. Typically this is your Postmaster account for which you will give full administrative access to MDaemon.

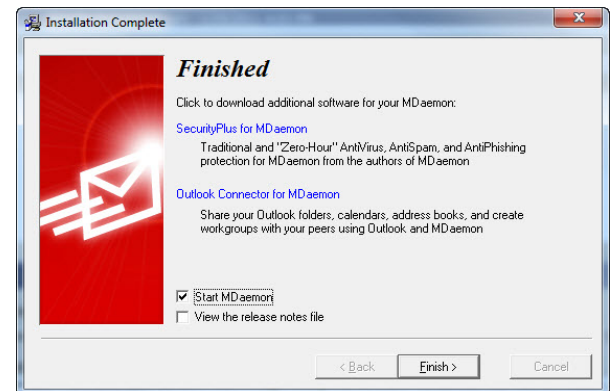

Step 4 – System Service Setup

Leave the box checked to install the MDaemon system as this will ensure that you mail server is started automatically when you start the computer. Click "Next" to continue.

Step 5 – Finish Install

Leave the box checked to start MDaemon. If you wish to view the release notes, check "View the release notes file." Click "Finish" to launch MDaemon. If no registration key was entered during installation, a fully functional 30-day trial of MDaemon will run once you receive the trial key to the email address supplied in step 8.

Step 6 – Product Activation

When MDAemon starts for the first time, the Product Activation Wizard will automatically begin. This is a one time process. Click “Next” to proceed.

Step 7 – Activation Method

Select “I want to activate automatically over the Internet”, and then click “Next” to continue.

Step 8 – Complete Activation

Click “Finish” to complete the activation process.

Install Complete.

Congratulations! Your installation is complete and you are ready to start using the MDAemon Messaging Server, BlackBerry Edition.

If you have any questions or require further instruction, please email support@ccsoftware, we’re always happy to help!
