Quick Start Guide

Step 1 — Install MDAemon

- a. Download the MDAemon file from www.ccsoftware.ca/mdaemon/download.cfm. Select Product Language and click appropriate FTP link.

- b. Double-click the MDAemon file of that you have downloaded to begin installation.
- c. Click “Next” on the Welcome screen.
- d. Select “I Agree” on the License Agreement.
- e. Select a destination directory for the installer to copy files to.
- f. Enter your registration information.

Leaving the registration key blank creates a 30-day trial key.

- g. Click “Next” to continue with the installation process. The files will be copied to the destination directory.

Quick Start Guide

Step 2 — Your Domain Name

Enter the domain name used in your email address (e.g. example.com).

Step 3 — Set Up Your First Account

Enter the full name, mailbox and password for your first account. Leave the box below checked to give this account full administrative access to MDAemon.

Quick Start Guide

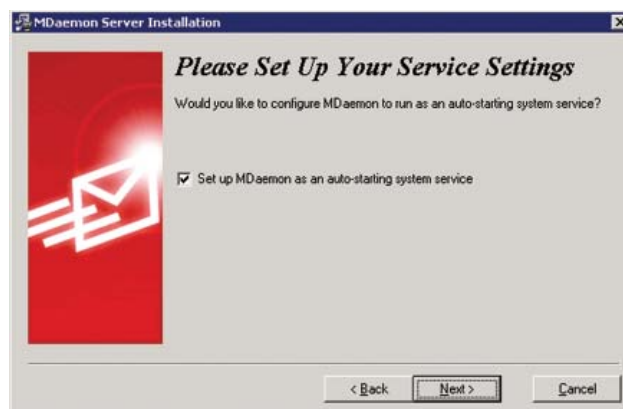

Step 4 — Set Up DNS

If you would like to use specific primary and backup DNS servers, enter their IP addresses in the blanks provided. Otherwise, check the box to use Windows DNS settings. Click the “Next” button to continue.

Step 5 — System Service Setup

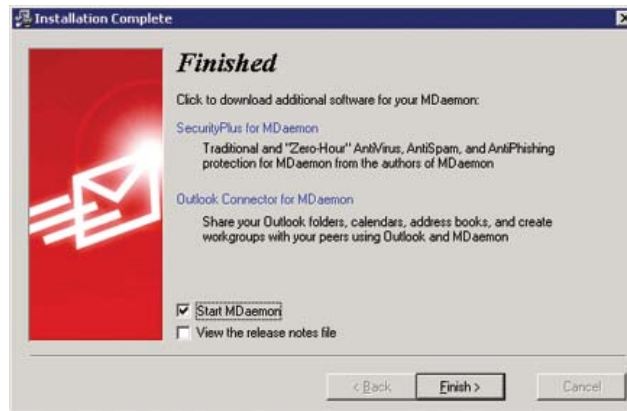

Leave the box checked to install the MDAemon system service. With the service installed, MDAemon will automatically start when you start the computer. Click “Next” to continue.

Quick Start Guide

Step 6 — Finish Install

Leave the box checked to start MDAemon. If you wish to view the release notes, check “View the release notes file”. Click “Finish” to launch MDAemon. If no registration key was entered during installation, a fully-functional 30-day trial of MDAemon will run.

Install Complete. Click “Ok” to launch MDAemon.

Congratulations. Your installation is complete and you are ready to start using MDAemon Email Server for Windows!
